EXHIBIT B

DESCRIPTION OF PROJECT

OVERVIEW:

This plan is intended to redevelop an area within the City of Lexington, which has been declared blighted and substandard within the meaning of the Community Redevelopment Law of the State of Nebraska.

The Developer intends to acquire, develop and rehabilitate the real estate shown on Exhibit A to the Redevelopment Contract by constructing a minimum 8,000 square foot commercial office area and shop, for the retail of cleaning services, storage of inventory and equipment, and performance of customer related services, along with necessary public parking, access, and landscaping. It is anticipated the accessed value of the project on completion will be approximately \$500,000.00.

The Developer will not develop the project in the redevelopment area or elsewhere without the benefit of the benefits under the redevelopment contract. The costs and risks of the project are simply too great to be absorbed by the Developer without this assistance.

The Agency shall grant to the Developer 100% of the proceeds of the TIF Indebtedness. The Developer shall use the proceeds to acquire the Premises and prepare the same for development, per activities outlined in Exhibit E.

EXHIBIT C
SERVICEMASTER REDEVELOPMENT PLAN

THE REDEVELOPMENT PLAN:

1. Relationship of Plan to Local objectives for appropriate land use: This plan contemplates no change in current land use. The area is currently zoned C-3 Highway Commercial and such land use is appropriate for the intended use. Reutilization of the existing real estate meets existing local objectives for appropriate land use for the area affected by this plan.
2. Relationship of Plan to Local objectives for improved traffic flow and public utilities in plan area:

Streets: Streets will conform to current layout and design as set forth in the various subdivision plats affecting the project.

Public Utilities: Public utilities will conform to the current layout and design of the project, no further improvements are anticipated, except for an extension of secondary utilities as required for the plan.

No special assessment districts will be established for the project development.
3. Redevelopment project boundaries: Exhibit B-1 to the Redevelopment Contract shows the boundaries of the project. The property is currently unimproved.
4. Proposed land use plan: Exhibit B-2 shows the proposed land use plan after redevelopment as a commercial development. This plat will not need to be amended and changed.
5. Information on standards for population densities; land coverage; building intensities; and land coverage after redevelopment: Population density will not change for the area. Currently there is no residential occupancy.
6. Statement regarding change in street layouts: This Plan proposes no change in current street layouts.
7. Site plan after redevelopment: Exhibit B-2 is an accurate proposed site plan of the redevelopment project after redevelopment.
8. Statement as to the kind and number of additional public facilities or utilities required to support land use after redevelopment: Additional public utilities will not be required to support the proposed plan.
9. Estimated costs to be incurred by the Agency for the project are as follows: No additional costs are expected to be incurred by the Agency for the project.

10. Pledge of Incremental Taxes. Pursuant to Section 18-2147 of the Act, any ad valorem tax levied upon real property in described in attached Exhibit A to the Redevelopment Contract shall be divided, for the period not to exceed 15 years after the effective date of the provision, which effective date shall be January 1, 2022. Said taxes shall be divided as follows:

- a. That portion of the ad valorem tax which is produced by levy at the rate fixed each year by or for each public body upon the redevelopment project valuation shall be paid into the funds, of each such public body in the same proportion as all other taxes collected by or for the bodies; and
- b. That portion of the ad valorem tax on real property in the redevelopment project in excess of such amount, if any, shall be allocated to and, when collected, paid into a special fund of the Agency to pay the principal of; the interest on, and any premiums due in connection with the TIF Indebtedness, loans, notes, or advances on money to, or indebtedness incurred by, whether funded, refunded, assumed, or otherwise, such Agency for financing or refinancing, in whole or in part, a redevelopment project. When such TIF Indebtedness, loans, notes, advances of money, or indebtedness including interest and premium due have been paid, the Agency shall so notify the County Assessor and County Treasurer and all ad valorem taxes upon real property in such redevelopment project shall be paid into the funds of the respective public bodies.

11. Cost Benefit Analysis. Pursuant to Section 18-2113 of the Act, this Plan when presented for recommendation and approval shall be accompanied by a cost benefit analysis. The cost-benefit analysis is available for public inspection at the City of Lexington City Offices, 406 E 7th, Lexington, NE 68850. Such analysis is as follows:

- a. **Tax shifts resulting from the approval of the use of funds pursuant to Section 18-2147:**

There are no negative tax shifts resulting from this Project. The taxes generated by the current value of the property shall continue to be allocated between taxing jurisdictions pursuant to standard statutory requirements. Only the incremental taxes created by the Project will be captured to pay eligible public expenditures. Since the incremental taxes would not exist without the use of TIF to support the Project, the true tax shift of this Project is a positive shift in taxes in the first year and a more substantial positive shift in taxes after 15 years. However, for the purposes of illustrating the incremental taxes used for TIF, the 15-year tax shift is as follows:

1. Redevelopment Project Valuation:	\$17,575
2. Projected Completed Project Assessed Valuation:	\$517,575
3. Projected Incremental Valuation:	\$500,000
4. Estimated Tax Levy:	1.916202
5. Annual Projected Tax Shift:	\$9,600

Note: The Projected Tax Increment is based on assumed values and levy rates; actual amounts and rates will vary from those assumptions, and it is understood that the actual tax shift may vary materially from the projected amount. The levy rate is assumed to be the 2022 levy rate. There has been no accounting for incremental growth or change in the tax levy over the 15-year TIF period.

b. Public infrastructure and community public service needs impacts and local tax impacts arising from the approval of the redevelopment project:

1. Public infrastructure improvements and impacts:

No substantial adverse effects are anticipated on the public infrastructure and community public service needs. The Redeveloper anticipates expenditures of approximately \$520,000 for construction and installation of the Project and related and ancillary improvements. Of these costs, approximately \$140,000 are TIF-eligible uses under the Community Development Law. TIF will be utilized to assist with the payment of these TIF-eligible costs and Redeveloper shall be responsible for the excess costs. Infrastructure improvements are included in the TIF uses for this Project, and said improvements shall positively impact the City. Redeveloper shall pay for all other Project costs, utilizing TIF to finance the eligible site-specific expenditures. No other public infrastructure improvements are anticipated to be necessary based on this Project, and the Project will not have a material adverse effect on any community public services. The list of anticipated TIF uses has been set forth in the Redevelopment Plan Amendment for this Project, and shall be detailed in the redevelopment agreement for this Project.

2. Local Tax impacts (in addition to impacts of Tax Shifts described above):

The Project will create material tax and other public revenue for the City and other local taxing jurisdictions. While the use of tax increment financing will defer receipt of a majority of new ad valorem real property taxes generated by the Project, the Project should generate immediate tax growth for the City. The Project will include an amount of personal property that will be on the property tax rolls upon its acquisition and installation. Additionally, the City should realize revenue from sales taxes paid during construction and service operations. The Project will also require and pay for City services. It is not anticipated that the Project will have any material adverse impact on such City services, and the City will generate revenue providing support for those services.

c. Impacts on employers and employees of firms locating or expanding within the boundaries of the area of the redevelopment project:

It is not anticipated that the Project will have a material adverse impact on employers and employees of firms locating or expanding within the boundaries of the area of the redevelopment project. The additional business operation should be a positive impact on the recruitment of new employers in the area.

d. Impacts on other employers and employees within the City and the immediate area that is located outside of the boundaries of the area of the redevelopment project:

The Project should have a material positive impact on private sector businesses in and around the area outside the boundaries of the redevelopment project. The Project is not anticipated to impose a burden or have a negative impact on other local area employers.

e. Impacts on the student populations of school districts within the City:

It is not anticipated that the Project will have a material impact on the student populations of the school district within the City.

f. Other impacts determined by the agency to be relevant to the consideration of costs and benefits arising from the redevelopment project:

The Project is anticipated to maintain current employment levels, as well as have the ability to create a modest employment increase. Wages and salaries will remain competitive in the industry. When secondary employment effects in other employment sectors are added, the total employment effects are expected to be even higher.

g. Summary of Findings:

The Project will increase the City's tax base, without material adverse effect on either public or private entities. The Project will increase property tax revenue in the long-term. The Project will facilitate the development of a blighted and substandard area of the City without the incurrence of significant public cost. The benefits outweigh the costs of the proposed Project.
