Table 36: Extraterritorial Jurisdiction Land Use, Lexington, 2013

Lexington currently exercises its statutory authority to enforce planning jurisdiction within two miles of the corporate boundary. An evaluation of land uses within this extraterritorial jurisdiction (ETJ) is important for future development and planning activities. The land uses found outside of the corporate limits are mostly agriculture, agricultural residential, and single-family residential, especially to the east of the community. Due to external and internal development pressures, as well as the proximity of major transportation routes, the percentage of residential uses found within the Lexington ETJ is higher than would be typical for a Midwestern community of this size.

In addition, all land uses that are found within Lexington are also found within the ETJ. This pattern is also influenced by the urban nature of the area, as well as the land use policies Lexington has held over time. The presence of all the same land use types in the ETJ will encourage greater development activity, which in turn can influence Lexington's ability to annex and grow at an increased rate over communities located in more rural settings.
