

**Energy Efficiency and Conservation Block Grant Program  
City of Lexington; #09/10-E 089**

All participating projects funded through the American Recovery and Reinvestment Act's (ARRA) State Energy Efficiency and Conservation Block Grant Program (EECBG) are required to provide a waste management plan as part of their award agreement. This requirement is one of several measures that allow the applicant to be exempted from Federal National Environmental Policy Act (NEPA) review of certain EECBG sub-grants.

The waste management plan will describe the Recipient's plan to dispose of any sanitary or hazardous waste (e.g., construction and demolition debris, old light bulbs, lead paint, lead ballasts, piping, roofing materials, discarded equipment, debris, and asbestos) generated as a result of the proposed project.

All subcontractors are required to identify, maintain proper control, and provide documentation for the disposition of materials described in the plan. The goal for the project is to ensure that all waste material generated will be recycled, re-used, or otherwise diverted from direct landfill disposal if possible. Each subcontractor is required to follow the plan for the disposition of the waste generated by the subcontractor's activity.

**WASTE MATERIAL DISPOSITION WORKSHEET**

The following worksheet identifies the disposition pathway for each waste material type to be generated as a result of the project.

Instructions:

- 1) Edit material / item list in left hand column to match Waste Material Estimating Worksheet.
- 2) Include **all** waste material types to be generated.
- 3) Edit remaining worksheet contents with relevant collection, transportation, disposition, and contact information as appropriate to suit project-specific requirements.

<b>Material / Item</b>	<b>Local Collection Point</b>	<b>Hauler</b>	<b>Disposition</b>	<b>Disposition Location</b>	<b>Contact Name / Phone #</b>
